LEARN

DO

MAKE **Make It In One Night**

No long-term commitment and no experience needed - just one night in the shop to make a project. This is a perfect opportunity to break out of your usual routine or enjoy a night out with a friend or partner. Experienced staff will guide you through all the steps to make a simple decorative or useful household item or gift. You'll gain some hands-on practice with tools and that great feeling of satisfaction that comes with making something with your own two hands. Fee based on project.

LEARN **Tool School**

Learn how to use tools properly and safely. Tool nights will introduce beginners to the ins and outs of the most common shop tools used on most projects. Each night will focus on one or two specific tools including safe operation, tool capabilities, and common usage. Gain the knowledge and confidence you need to start building. Tools covered on a regular rotating basis include table saw, chop saw, bandsaw, router, jointer and planer. Sign up for one or all.

DO **Open Shop**

Need a place to work on your woodworking project? Or, need access to hand tools or machines? You can now register to use the shop during open shop hours. Staff are on hand to help you find tools, answer basic questions or give advice but you should already have woodworking experience and require little guidance. (Join us for Tool School nights to learn how to use tools). Each open shop night (or day) gives you up to 3 hours in the shop.

Registration is required for all programs. See all details
